Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6 and 10, drawn to a barrier coating composition.

Group II, claims 7-9, drawn to a display coated with the barrier coating composition.

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: while it is recognized that there is a technical relationship between the Groups set forth above (i.e., the barrier coating composition), it is the examiner's position that this technical relationship does not amount to a special technical feature because the barrier coating composition fails to define a contribution over the prior art. WO 98-56861 (cited on the International Search Report as an "X" reference) discloses an aqueous coating composition comprising a polymer and an exfoliated platelet filler (i.e., inorganic flake material)
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
